Calling on Proven Strength

What is TABS.IT?

TABS.IT is a user friendly cost-effective call accounting system for managing and controlling your telecommunications network. The ideal solution for small businesses and large enterprises, TABS.IT powerful data collection mechanism gathers information and tracks calls from multiple sources of communications activity including legacy voice and VoIP networks. Utilizing the system's web-based features, companies can regain control over communication expenses, cut down operational costs and optimize network resources.

Get Control Of Your Communications Costs

- Identify and deter misuse of your communications system.
- Allocate communications expenses within your organization.
- Report usage of cell phones, calling cards and pagers.
- Compare your current rate plan with plans from competing carriers.
- Monitor PBX effectiveness and optimize your network.

Who Uses TABS.IT?

In addition to serving Enterprises for all their call accounting needs, TABS.IT is designed to accommodate the specialized requirements of the following market segments:

- Hotels
- Universities
- Utilities
- Tenant sharing
- Law firms
- Financial institutions
- Hospitals
- Accounting firms
- Government
- Transportation
- Healthcare
- Call Centers

TABS.IT Optional Modules

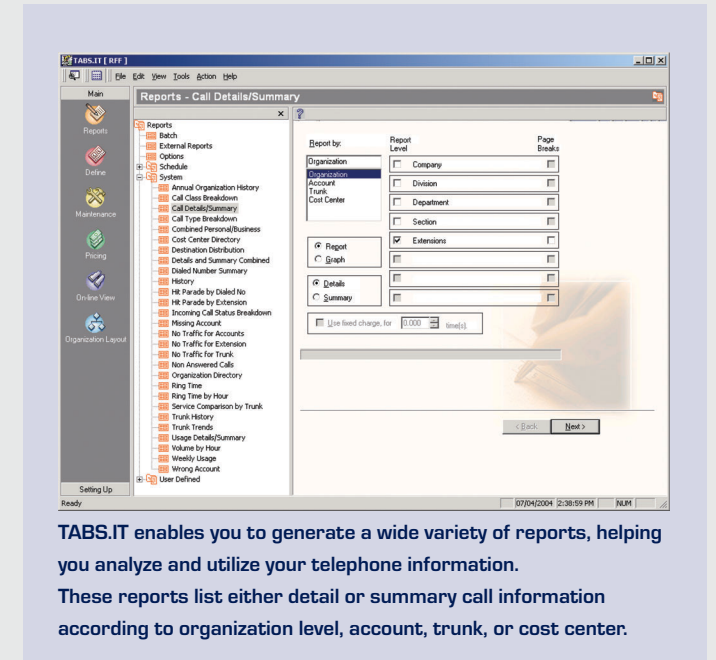

- Web User Interface** - TABS.IT can be easily accessed from any Internet browser via the system's Web access module
- Directory Exchange** - synchronizes the TABS.IT directory with your PBX or any other directory database eliminating redundant administrative tasks.
- Tie Line Reconciliation (TLR)** - accurately costs calls in a private PBX network. TLR calculates the actual cost of calls routed over private tie lines, and assigns charges to the originating extension.
- PMSi** - integrates TABS.IT with your property management system, to bill phone usage back to your guests, patients, or tenants.

Increase Your Employees' Productivity

- Increase employee productivity by evaluating personal and business calls.
- Improve customer service by monitoring sales representatives for call volume and duration.

TABS.IT Reports

TABS.IT Reports are a central feature for gathering and analyzing information regarding the resources and services, enabling management to view their overall operation in a different focus and perspective. MTS' powerful custom report generator can run reports ad-hoc or have them scheduled to be automatically sent to e-mail addresses.

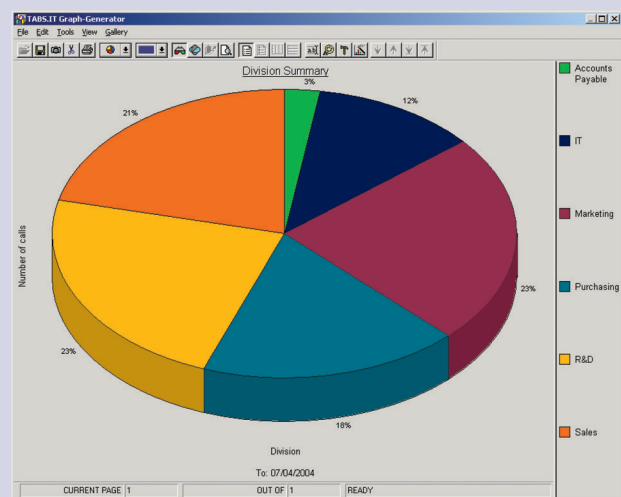

TABS.IT enables you to generate a wide variety of reports, helping you analyze and utilize your telephone information. These reports list either detail or summary call information according to organization level, account, trunk, or cost center.

Reports

Category	Report Name
Detail and Summary	Usage: for extensions, trunks, organization ■ Accounts, projects, profit centers ■ Business and Personal
Organizational	Organization Directory ■ Cost Center Directory
Exception	Hit Parade by Dialed Number/Extension ■ Top "n"
Performance	Service Comparison By Trunk ■ Missing Accounts ■ Wrong Accounts ■ Non Answered Calls
Utilization	Call Volume by Hour ■ Usage Details/Summary ■ Weekly Usage ■ No Traffic for Accounts/Extensions/Trunks
History	Annual Organization History ■ History Report ■ Trunk History/Trends
Statistics	Call Class Breakdown ■ Call Type Breakdown ■ Incoming Calls Breakdown ■ Dialed Number Summary/Frequency

Graphs

Annual Organization History ■ Call Class Breakdown ■ Call Summary ■ Ring Time ■ Ring time by Hour

TABS.IT gives you a choice of presenting the data requested in a variety of graphical formats.
